EXPERIENCE

SMARTPRINTY ADVERTISING – DUBAI

2016 – Present

Designer & Digital Marketing

- Lead the end-to-end design process for print media, including complex multi-page brochures, catalogs, and advertising leaflets.
- Develop promotional branding materials for diverse corporate clients across the UAE, ensuring strong visual identity and brand consistency.
- Manage digital marketing design assets, integrating online and offline campaigns.
- Oversee pre-press procedures and liaise with printing partners to guarantee high-quality production finishes.

DC INFOTEC – KERALA, INDIA

2014 – 2016

Graphic Designer

- Designed engaging marketing materials and corporate identities, significantly improving brand presentation for clients.
- Created typography, layout designs, and custom graphics for a variety of print and digital formats.

FREELANCE DESIGNER

2013 – 2014

Web & Graphic Design

- Provided bespoke web and graphic design services to independent clients and small businesses.
- Delivered creative solutions from initial concept through to final delivery, ensuring client satisfaction and project timeliness.

EDUCATION

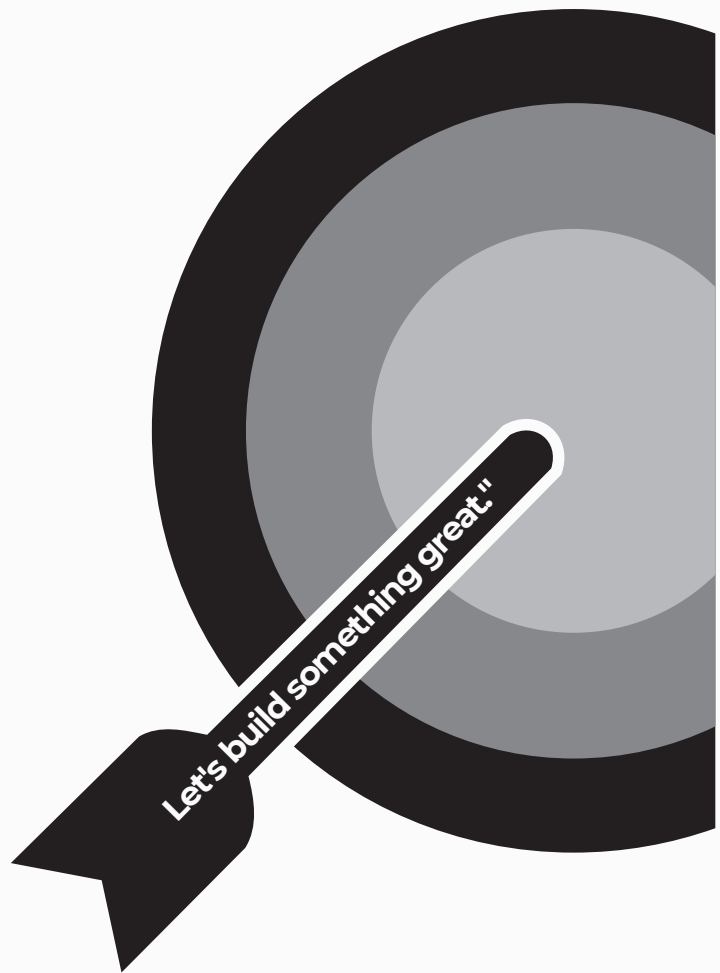

2011 – 2014

B.Sc Multimedia (Image Creative Education Thrissur)
Annamalai University

2010

V.H.S.E (Accountancy & Auditing)
Kerala State Board

PORTFOLIO

OUR STORY

At Golden Ace Precious Metal Testing, we are committed to providing the most accurate, reliable, and transparent precious metal analysis services in Dubai. We work for the benefit of refiners, jewelers, traders, and individual customers.

Our reputation is built on a foundation of decades of experience and an unwavering commitment to excellence and transparent services.

OUR FOUNDATION OF EXPERTISE

Our strength lies in the expertise of our team. Our technical head and Chief Analyst, Mr. Shamsul-Jawad, has over 30 years of experience in fire assay and precious metal analysis. He has been a leader in the UAE's gold industry, having worked with some of the most respected refineries, including:

- Sam Precious Metals LLC
- Al Khad Gold Refinery DMCC
- Al Ghafra Gold Refinery

Certified gold testing using the fire assay method accurate, reliable, and trusted for true gold purity results.

Fire Assay Testing
For the highest accuracy, we offer fire assay testing. This involves a three-step process: melting, leaching, and weighing. The resulting gold is then assayed using a gravimetric method (99.999%) for determining gold content. Ideal for refiners, high-value carvers, and manufacturing facilities.

XRF Testing
X-ray fluorescence (XRF) testing is a fast, non-destructive method used to analyze the elemental composition of gold and other precious metals.

Silver Percentage Analysis
Our advanced testing services precisely measure the silver content in gold items, helping jewelers, refiners, and industrial sectors for valuation and trade informed decisions.

Gold Scrap Melting
Melting scrap gold requires melting pots, electronics, dental gold or industrial waste to recover pure or alloyed gold for refining and reuse.

Laser Marking for Gold
Add value and security to your gold items with our laser marking service. Perfect for branding, authentication, or personal customization of ornaments.
